DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach an axial tube assembly of a motor having an engaging member including a base and a plurality of resilient legs with the base sealing a bottom end of the tube and where a sleeve with a bearing mounted therein is held by the resilient legs as recited in claim 1.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Horng et al. 6,617,736 B1 figure 1 shows the same device as shown in figure 1 of the instant application, labeled prior art in the instant application. There is no sleeve in Horng et al. '736. Horng et al. 6,815,852 B2 discloses sealing the bottom end of an axial tube motor as shown in figure 4 but also does not disclose a sleeve. Hirose et al. 6,756,715 B2 also teaches sealing the bottom end of an axial tube motor in order to make a fluid reservoir 21 as shown in figure 2 and as described in column 6 lines 29-32. Hirose et al. does not disclose an engaging member having a plurality of resilient legs and does not disclose a sleeve. No reason has been found for combining elements of these references together to produce something like the instant invention.

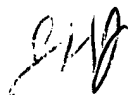

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
